DECLARATION REGARDING EXPERIMENTAL USE

As a below named inventor, I HEREBY DECLARE:

THAT I am the named inventor in the accompanying U.S. non-provisional patent application entitled "PRESSURE WASHING SYSTEM, COMPONENTS AND METHODS";

THAT I used a water collector somewhat similar to the fluid collector disclosed and claimed in the accompanying patent application in connection with a conventional high-pressure washing system more than one year ago prior to the filing date of the accompanying patent application. The experimental water collector had a suction conduit with holes only at the bottom facing directly toward the supporting surface for the collector. It was determined experimentally that the experimental water collector did not operate satisfactorily in that it did not capture the waste water runoff in a proper manner since an undesirable quantity of water escaped from the collector.

I FURTHER DECLARE THAT all statements made herein of my own knowledge are true, and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.
